Curriculum for Scotland

Biological Systems

| Body systems and cells | |
|------------------------|-------------------------------------------------------------------------------------------------------------|
| Early HWB 0-47b | I am aware of my growing body and I am learning the correct names for its different parts and how they work |
| First SCN 1-12a | By researching, I can describe the position and function of the skeleton and major organs of the human body |

The main organs and bones in the human body – male and female - are introduced through an interactive 'Body Fact File'

The positions of the organs and bones can be viewed in three dimensions by rotating the body.

An interactive body builder allows pupils to identify each of the bones (or organs) of the body and place them in their correct position. Pupils can test themselves by putting a body together against the clock.

Individual worksheets for each organ are available to reinforce learning on this topic.
